WORK EXPERIENCE

Assistant System Engineer
Tata Consultancy Services

11/2019 - Present   *Kolkata*

Achievements/Tasks
- **Platform**: A web application that would work as an underwriter platform for the country's leading client in the field of Insurance.
- Worked on multiple domains, such as accounting, underwriting and finance.
- Single handedly delivered ~ **30+** features in a single year.

Front End Developer Intern
Enigma Digital

06/2018 - 08/2018   *New Delhi*

Achievements/Tasks
- Worked as a Web Developer Intern to develop web pages by using scripting languages, overlooking some designs.

PERSONAL PROJECTS

Portfolio v1.0
- Created a personalized portfolio website for myself to showcase a digital portfolio rather than old styled resume's.
- **Tech-Stack:** HTML, CSS, React JS, Styled Icons
- **URL:** https://iamsurajsingh.github.io/mypage
- **Git:** https://www.github.com/iamsurajsingh/mypage

Vaccine Availability Finder
- It was a tough task to find a vaccine slot by just sitting with the devices to book the slots from the CoWin website in the initial days. Developed a vaccine availability alert mechanism that triggered a mail to our email addresses with all the locations where slots where available.
- **Tech-Stack**: Python, API, SMTP
- **Github:** https://github.com/iamsurajsingh/VaccineAvailability

COVID-19 Tracker & Analyzer
- A Tracker that helps to track and analyze the current scenario of Novel Coronavirus globally.
- Country wise search results available.
- **Tech-Stack:** HTML, CSS, React JS
- **URL:** https://iamsurajsingh.github.io/covidtracker
- **Git:** https://www.github.com/iamsurajsingh/covidtracker

EDUCATION

Bachelor of Technology
Noida Institute of Engineering and Technology

08/2015 - 06/2019   *Greater Noida*

Courses
- Information Technology

SKILLS

HTML   CSS   Javascript   ReactJS   C++
Data Structures & Algorithms   PLSQL

POSITION OF RESPONSIBILITES

Financial Solutions Developer (11/2019 - Present)
Created the complete premium design for the product and integrating it to calculate premium based on data from customer. Worked on the development of multiple covers, hierarchy and the business logic as per the regulation from IRDAI.

Production Support Developer (06/2021 - Present)
Handle all the development related defects in realtime that won't allow hampering of business to client. Solve all the low level to critical defects and deliver them post regression testing from testers. Each functionalities developed was made sure that it worked properly in sync with core and the portal.
